

AIRX AIRICIDE

Foul Odour Eliminator

Squirt directly onto the source of bad odours, add to cleaning solutions or add to rinse water

AirX Airicide is a multi purpose water soluble counteractant that is many times the concentration of ordinary deodorizers, making it more effective against stronger & more disagreeable odours & also giving it a longer residual action.

AirX Airicide is formulated with Airicide odour counteractant to change the "geometries" of odour molecules in the air, consequently changing the way they are perceived by our olfactory senses & causing odours to be no longer perceived as unpleasant.

AirX Airicide counteracts odours from animals, cigarettes, cigars, cooking, sickness, liquor, garbage, paint, chemicals etc.

AirX Airicide can be used in a number of ways:

- Just squirt **AirX Airicide** on the source of the odour,
- Add to cleaning solutions, carpet shampoo & rinse water
- Dilute with water and use as a space spray

Benefits

- **COUNTERACTS ODOURS THE AIRX WAY** - Based on the accepted scientific theory that if the size or shape of an odour molecule is changed, the odor is no longer perceived as offensive.
- **SUPER STRENGTH** - Many times the concentration & lasting ability of typical deodorizers.
- **CONVENIENT** - High concentration allows packaging in smaller sizes that can easily be transported & stored.
- **VERSATILE** - Counteracts odours from a wide range of sources including smoking, cooking, animals, liquor, chemicals, sickness etc.
- **NON-STAINING** - Can be applied directly to most surfaces without risk of staining or damaging that surface.
- **WATER SOLUBLE** - Dilutes with water & mixes completely without stirring, making it ideal for addition to cleaning solutions, rug shampoos & rinse water.

Airicide Foul Odour Eliminator

AirX Airicide is a versatile water soluble odour counteractant in a highly concentrated form. To cure the most difficult odour problems It employs exclusive airicide odor neutralizer to eliminate odours at the source and those already in the air.

Uses

Counteracts most common foul odours. For use in hospitals, nursing homes, institutions, schools, hotels, motels, buses, airplanes, boats etc. Erases foul odours in bathrooms, locker rooms, kitchens, basements, bed pans, commodes, air conditioners etc.

Directions

DAILY – Squirt a few drops on the bottom of chair seats, in waste baskets & garbage cans.

HUMAN INCONTINENCE, PET ACCIDENTS – Squirt on source of odour to make clean-up more pleasant. Add **AirX Airicide** to detergent.

HOSPITALS, NURSING HOMES – Squirt in bed pans, commodes, on dirty linen, used bandages.

HOTELS, MOTELS – Squirt on bath mat, on shower curtain or in air conditioner.

RUGS, SHAMPOOS, CLEANING SOLUTIONS – Add one small squirt per litre of mixed solution. Use also in rinse water.

SINKS, DRAINS, MARINE & PORTABLE TOILETS – Add 10ml per litre of liquid in holding tank.
