

AIRX[®] SUPER SPRAY & WIPE

Heavy Duty Cleaner, Disinfectant & Odour Counteractant

Kills more germs faster, a practical spray & wipe disinfectant cleaner

AirX Super Spray & Wipe is made from 2nd generation, or 'dual' quaternary compounds. These are much more effective than their predecessors, both in terms of their disinfecting & their cleaning power.

AirX Super is able to kill a wide range of resistant bacteria that are left unharmed by traditional 1st generation disinfectants, even those that are branded 'hospital grade'. This includes HIV, Hepatitis A, B & C, Parvo Virus, resistant strains of Salmonella & E-Coli, even TB.

The ability to kill the Mycobacterium tuberculosis bacilli (TB) is a requirement for use of a product for clean-up of blood spills. Many quaternary disinfectant cleaners do not meet this requirement ... but **AirX Super** does. The problem is that the Mycobacterium tuberculosis bacilli is protected by a tough shell the typical quat formula can not pierce. The superior penetration of **AirX Super** allows it to break through that shell.

As you can see from the listing on the back, **AirX Super** kills many organisms much faster than competitive products. That's critical for products used for spray & wipe disinfecting. Because they are on the surface for such a short time, this quick penetration is also indicative of **AirX Super's** ability to penetrate, dissolve & suspend greasy, oily soil.

Faster germicidal kill & better cleaning makes **AirX Super** the best spray & wipe cleaner, for complete decontamination or your money back.

Benefits

- **KILLS M. TUBERCULOSIS BACILLUS** - Because it can penetrate the tough waxy shell that surrounds the bacteria that resists typical quaternary disinfectants.
- **KILLS HIV 1 VIRUS** associated with AIDS.
- **HOSPITAL TYPE** - Kills a broad range of Gram negative & Gram positive bacteria including Pseudomonas aeruginosa.
- **A SUPERIOR CLEANER/DEGREASER** - Penetrates, liquifies & removes oily, greasy soil.
- **ODOR COUNTERACTANT** - Contains Airicide[®] to eliminate foul odors in the air & kill putrefactive bacteria.
- **NON-FLAMMABLE** - No alcohol or other flammables.
- **BIODEGRADABLE** - Both the surfactant & the disinfectant are biodegradable - contains no phosphates.
- **ECONOMICAL** - Spray bottles contain a full 32 ounces compared to about 5 ounces of cleaner/disinfectant (after alcohol & propellant) in a typical aerosol.
- **PLEASANT AROMA** - Contains no phenol, so there's no unpleasant phenolic odor during or after use.
- **CONVENIENT** - **AirX Super** is ready to use. Nothing to mix at time of need. Just spray & the surface can be disinfectant clean.

AirX Super Heavy Duty Cleaner, Disinfectant & Odour Counteractant

AirX Super is a quaternary ammonium based disinfectant cleaner that is unique in its ability to kill the M. Tuberculosis bacillus in addition to a broad range of other Gram positive & Gram negative bacteria, as well as the AIDS virus & pathogenic fungi. As a spray & wipe cleaner the same superior penetrating ability that allows **AirX Super** to pierce the tough waxy shell surrounding the TB organism makes it outstanding in its ability to penetrate, loosen & remove stubborn, heavy soil.

Uses

For disinfecting and cleaning hard, non-porous inanimate environmental surfaces in hospitals, nursing homes, patient rooms, operating rooms, public restrooms, schools, food service establishments, transportation terminals, office buildings, manufacturing facilities, lodging establishments, veterinary clinics, athletic & recreational facilities.

Directions

Remove gross filth & heavy soil. With container 6 to 8 inches from surface, spray area to be cleaned until it is covered with solution. Allow **AirX Super** to remain wet for time indicated in column on right, then wipe off with a clean cloth or sponge. Scrubbing is not necessary.

Specifications

ACTIVE INGREDIENTS

n-Alkyl (60% C14, 30% C16, 5% C12, 5% C18) dimethyl benzyl ammonium chlorides0.105%
 n-Alkyl (68% C12, 32% C14) dimethyl ethylbenzyl ammonium chlorides0.105%

INERT INGREDIENTS Cleaners and Airicide® 99.790%

TYPE GERMICIDESDual quaternary blend

TYPE DETERGENTS non-ionic

ODOR COUNTERACTANT Airicide® proprietary additive

COLOR None

pH <10

VISCOSITYWater thin

PHOSPHATE CONTENT None

FREEZE-THAW STABILITY Excellent

BIODEGRADABILITY Complete-both

SHELF LIFE 2 years minimum

SPECIFIC GRAVITY 1.01 ± .01

FLASH POINT None to boiling point

EPA REGISTRATION NO. 1839-83-44089
